LAWN CARE PROGRAM

Round 1 (March-April) – Liquid application:

- Balanced fertilizer (Nitrogen, Phosphorus, Potassium (Potash) or **NPK**)
- Micronutrients: Sulfur and Chelate iron
- Pre-emergent crabgrass and broadleaf control
- Post-emergent broadleaf weed control – including Dandelions
- Surfactants to enhance application results

Round 2 (May-June) – Granular application:

- Balanced slow release fertilizer (NPK)
- Micronutrients: Sulfur
- Post-emergent broadleaf weed control – including Clover
- Inspect for lawn issues – sprinkler/mowing/pest

Round 3 (May-June) – Granular application:

- Performed at the same time as round 2 application
- Systemic turf insect control for Billbugs.

Round 4 (July-August) – Granular application:

- Balanced slow release fertilizer (NPK)
- Micronutrients: Sulfur
- Post-emergent broadleaf weed control – including Spurge
- Inspect for lawn issues – sprinkler/mowing/pest

Round 5 (October-November) – Granular application

- Balanced slow release fertilizer (NPK)
- Micronutrients: Sulfur
- Post-emergent broadleaf weed control
- Inspect for lawn issues – sprinkler/mowing/pest
- Grass will store nutrients over the winter for more vigorous growth in the Spring

OPTIONAL – Exterior Pest Control (Spring – Fall):

- Exterior liquid spray around house foundation
- Helps prevent insects and spiders from coming into your home
- 3 application program for season-long control
